DETAILED ACTION

Claim Objections

Claims 2-8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fleischer et al, newly cited.

The reference to Fleischer et al teaches the manufacture of a thermoplastic composition that may comprise A) a non-fluorinated melt processable polymer, being chlorinated polyethylene as recited in claim 9 and B) 100 to 20 000 parts per million by weight, based on total weight of the extrudable composition, of fluoropolymer, within the range claimed of 25 to 2000 parts per million, said fluoropolymer having a weight average particle size greater than 2 microns and less than 10 microns, as claimed in claim 1. Note column 2 (lines 21-31 and lines 51-68) for the compositional limitations and particle sizes contemplated for the fluoropolymer particles. Note column 3, first paragraph for the fluoropolymers employed.

Art Unit: 1711

The patents to Hedberg et al and Rosinski et al, cited of interest, both teach similar compositions of a fluoropolymer with a thermoplastic polymer, as herein contemplated. Neither reference teaches nor suggests the employment of a particulate fluoropolymer as claimed herein. Note in Hedberg et al at column 1 (lines 21-43) and the Examples. Note in Rosinski et al at column 2 (lines 31-59) and claim 1 at column 4.
